**CATARRH**

is a LOCAL DISEASE and is the result of colds and sudden climatic changes. It can be cured by a pleasant remedy which is applied directly to the nostrils. It gives relief at once.

**Ely's Cream Balm**

is a Retired Burglar.

Not Often Really Frightened, but Now and Then Perhaps a Little Startled.

I don't suppose a man in my business is apt to get frightened very much," said the retired burglar. "He's all the time expecting things to happen, and he's always on the lookout for them. Still, I suppose that any man, unless he has an absolutely cast iron nerve, and such men are very few, is likely at times to be startled. I know that I am. For instance

I went into a house one night, and after groping around down stairs for a while in the blackest kind of darkness I went up stairs. There I found an open door. I had located from the outside of the house the windows of the room that this door opened into, and when I struck the door I knew where the bed ought to be. It was there, and I went along the side of it until I came to the head. I found a chair there with a man's clothes piled up on it. I picked up the trousers, and as I began to feel in the pocket—b-r-r-r-r-r-r-r-r-r!—went an alarm clock on the bureau, not a foot from my head, and out of bed jumped a man, bumping square against me, of course not knowing I was there, but knocking me sideways and tumbling over on the floor himself.

"I certainly was startled, by that alarm clock, make no mistake about that, and I have no doubt in my own mind that the man that jumped out of bed was startled when he fell over me, but I didn't say so to ask him about that."—N.Y. Tribune.

## THE ELECTRIC SUCKER.

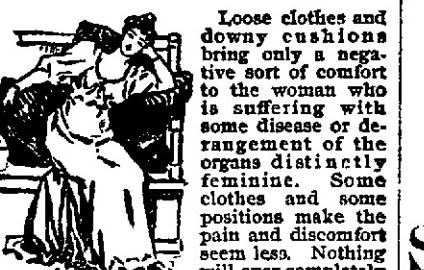

A German's Account of a Wonderful Fish Found in the Nile.

In an article in Ueber Land und Meer on "Electrical Phenomena in the Animal World," Dr. Frolich tells about a sucker first found in the Nile and its tributaries by modern scientific men in 1881, but well known to the ancient Egyptians as the "sucker thunder god," being worshipped as such in a sucker god temple in the city of the thunder sucker, or Oryzorrhynchus. The reason they called it the thunder sucker, instead of the "thunder fish," was because they knew of another fish, known to the English speaking people as the electric cat (fish), to the Germans as the zitterwels, or the shad that makes one tremble. It grows to a length of about a foot, of which the head and nose take up a quarter, and at the deepest part measures more than a quarter of its length.

Just why the modern scientific men did not know of this fish before is a question a layman finds it hard to answer except that the sucker is a bottom fish. The old Egyptians probably learned of the animal after a Nile flood, when some philosopher was meditating over a mud puddle left by the receding water. He saw a funny fish struggling in the water, and out of a desire for knowledge, reached for the fish and touched it. If there were any disciples of the philosopher hard by, they probably saw the philosopher act surprisingly—as the stoic Indian did when he got hold of a galvanic battery. Thereafter the fish was worshipped, having a name which associated it with "the thunder god of the skies," although the ancients knew nothing of electricity according to the learned of today.

A peculiar thing about the various electrical fish is that should one swim even at a considerable distance from a human bather, the bather would know of its proximity by an "electrical sensation," while many of them have batteries actually fit to kill a horse on contact. These fish are far ahead of the human beings in the matter of weapons, "for they stun their prey at a great distance in the water."

Address, World's Dispensary Medical Association, Buffalo, N.Y.

Loose clothes and downy cushions give a comparative sort of comfort to the woman who is suffering with some disease or derangement of the organs distinctly marked. Some persons like clothes and some positions make the pain and discomfort seem less. Nothing will ever completely remove the disease, but a radical

cure. The effects of such disease are not limited to mere local discomforts but extend over the whole body. Perhaps the nerves are most affected, and this in turn disturbs the digestion. After that there is no telling what form the trouble may take. With irritable nerves the position is different. It may be that the disease is not the strongest, but the woman is.

Women are notoriously negligent in matters pertaining to their health. Too many of them understand too little about their own physical make-up. They do not understand their possibilities or their limitations, and that is not the case without cause. Few women know when a symptom is really serious and when it is not. This naturally makes them overlook the plainest of danger signals.

The start of everything is simple. The start of so-called "female complaints" may be very slight indeed. It may be that in the beginning of some small hygienic measures would stop the trouble. Certainly at this time, a little bit of the right medicine would stop it. When the trouble becomes worse, it is harder to cure, but still it can be cured. Dr. Pierce's Favorite Prescription will prove to be the strongest and most effective.

It may be that the trouble is not the strongest, but the woman is. Fancy Meats of all kinds put up in the Finest Style of the Art and delivered o

## BECKER BREWING CO.

INCORPORATED.

MANUFACTURERS AND BOTTLERS OF

## Silver Ribbon Lager Beer.

Soda Water, Orange Cider, Sarsaparilla and Iron, Birch Beer, Champagne Cider.

Shop—Commercial Row, Reno, Nev.

Flower Festivals, Fiestas, Rose Carnivals,

AND THE LIKE, WILL BE THE DE-

light of California for the next two or three months.

Santa Barbara Flower Festival, the fame of which is world-wide, and the glory of which, like that of Solomon, is not half told, opens April 15. Queen Flora will reign three days an arbitrary and absolute despot.

La Fiesta de Los Angeles, now fixed in the chronology of California feasts, and not less illustrious than its older prototype, commences April 22, and the riot of fun will spread over four days.

The Carnival of Roses, to take place in San Jose, May 6th to 9th, inclusive, though a more recent candidate for favors of the fun-loving world, yet because of the limitless possibilities of the Garden City for anything that is made of roses is quite as full of promise.

REduced RATES

Will be made by the Southern Pacific Company for all these brilliant events. Arrange your programmes accordingly, and call on agents for particulars.

L. P. FISHER, NEWSPAPER ADVERTISING AGENT, MERCHANTS' EXCHANGE, SAN FRANCISCO, IS OUR AUTHORIZED AGENT. THIS PAPER IS KEPT ON FILE IN HIS OFFICE.

### THE QUESTION OF TAXATION.

Not one taxpayer in fifty ever stops to consider the question of taxes; what becomes of the large amount of money paid into the county treasury; to what use the money is applied, or who pays the greater tax or the least. Taxpayers as a rule simply glance at the published report of the levy, see that it amounts to \$2.90 on the \$100 valuation and give the subject no further thought until the time arrives to dig up the cash, and then suddenly feel that taxes are a burden. A few days of skimping, rustling, borrowing, etc., brings the required amount, and it is paid. A feeling of relief follows and the matter is banished from the mind for another year. To the taxpayer generally it is a matter of indifference what becomes of the money, how it is spent, whether any good will come out of it or not. He has paid his taxes, feels his obligation to the State and country has been cancelled and that his money thrown away, and don't care fig, for it is the public's money and his responsibility has ceased. Even some of the largest taxpayers, while complaining at the treatment, will, if the question of taxation comes up in minuscule, pay, "I don't care fig, for it is the public's money; what's the difference?" This is not justice to the officers who have the management of public affairs, nor is it an evidence of good sense on the part of the taxpayer.

Every now and then some question is brought up regarding the lavish or perhaps foolish expenditure of public money and there is more or less comment, but one says, "I don't care to make a kick," and another remarks, "It is none of my affair," and the result is, nothing is accomplished and the growl goes on.

Public officials are men and are as easily approached as other men and when it comes to public affairs, taxpayers have a right to approach them and inquire into and suggest such consideration and action as will remedy any irregularity that may seem to exist. This is nearly always neglected, and the result is, that if there is cause for fault finding it is limited to a few who, without any prejudice or feeling of enmity towards any party concerned, by calling the attention of the public to its own interest and affairs, are immediately pronounced cranks or something worse.

Now, to go into a few details regarding the revenue from taxation, licenses, official fees and other sources, no matter how or from whence it comes, it is derived from the public and is apportioned to salaries, schools, roads, indigent and other expenses, presumably for the public good and for the up-building and advancement of the community.

Approximately, nearly \$75,000 a year, not considering the State's proportion, is collected from the people of Washoe county for the above purposes and in a majority of instances when a taxpayer is asked who pays the greater proportion of this, according to the valuation, one is immediately answered, that the corporations, mortgage holders, capitalists, etc., of course, because they have the greater interests.

This is not true, although they may pay a greater amount of money, they in reality pay the minimum rate of taxation, viz. \$2.90 on the \$100 valuation, or whatever the levy may be. The truth is that the struggling business man pays perhaps five or six times the rate levied on each \$100 valuation. An example or two taken from actual business life in Reno may, perhaps, illustrate the proposition more clearly.

A certain business man in Reno not a block from the postoffice, carries a \$1,500 stock, by actual inventory. He is assessed at \$1,000 at \$2.90. Watchman, at \$2 per month ..... 24.00 Carpenter, at \$8 per month ..... 12.00 Merchantile license, per quarter ..... 12.00 Incorporation license, \$8 per quarter ..... 12.00 Street sprinkling, six months ..... 9.00 A total tax of ..... 91.00 On his assessed valuation of \$1,000, or \$11.60 on the \$100, every item of which is a tax and which goes into the public service and cannot be called anything else.

In addition to this the same man pays a revenue license to conduct his business, rents, water, lights, clerk and the usual expenses connected with an ordinary business place.

This man, and he is only one of an hundred examples that can be given in Reno, is paying an absolute tax of \$11.60 on the \$100 valuation, while the man that owns or has the mortgage on the building that the former is doing business in, with a valuation of \$5,000, pays at the rate of \$2.90 or \$14.50, and the other pays \$16 on \$1,000.

Is it any wonder that business men are pushed and compelled to scratch and figure and in the end go to the wall and have their creditors insinuate that there has been crookedness or some other dishonest feature in their failure? The question is one worthy of consideration and if the public safety, improvement, convenience, etc., must be subserved, let everyone interested share alike in the expense.

JUDGING from telegraphic reports, the last storm has been general all over the coast and will, in a great measure offset the damage of the heavy frosts experienced during the past three weeks in many of the valleys and on the foothills of California. While a severe loss has been sustained by the vineyard-

ists and fruit growers, the rain has been the wheat growers' and stockmen's salvation. The wheat fields were parched and a few more days of dry weather would have ended any possibility of crop. The hills and ranges were drying up and livestock had already commenced a struggle for existence.

The storm came just in time and the farmers of California are now sure of a more than average crop, while the stockmen are delighted. What is one's loss is another's gain, so that in the general arrangement of masters, kind Providence shows little partiality.

A SQUARE FIGHT on the silver question has been made in Missouri and Alabama, and in such the silver men have been victorious. In 78 counties in Missouri, silver delegates have been elected to the State Convention, and outside the city of St. Louis the champion of the white metal will have it all their own way. The St. Louis *Globe-Democrat*, the most radical standard paper in the Mississippi valley, is disgusted, and says the job of proving to the country that Missouri is not wedded to that relic of barbarism, the silver standard, will now devolve on the Republicans.

### The Venezuelan Question.

WASHINGTON, April 24.—The report on the Venezuelan question has been reached a critical stage. Owing to action it has developed two sets, namely, that the United States Government has not offered or suggested the withdrawal of the present Commission, and that negotiations toward general arbitration between the United States and Great Britain are proceeding satisfactorily, although there has been little progress as yet towards having the Venezuelan dispute included in the general scope of arbitration. Aside

from these two material points, the general status of the subject, it is stated, has not changed of late, and there is no uneasiness lest the negotiations lapse or fail. It is the general understanding that the Commission has not completed its work yet.

### The South African Trouble.

CAPE TOW, April 21.—Telegraphic communication with Bulawayo was reopened for a time to-day, when there was another break. While the wire was working dispatches were received from several sources in the besieged town. The news seems somewhat conflicting but the main fact seems well established that the British sortie in force, encountered large numbers of natives and killed perhaps a thousand. They were at one time in danger of annihilation and finally retreated.

### Pledged Guilty of High Treason.

PRETORIA, South Africa, April 21.—Cecil Rhodes, Lionel Phillips and George Farar, members of the Johannesburg Reform Committee, pleaded guilty to high treason to-day. Other members pleaded guilty to *lesse majeure*, without hostile intention against the Government of Transvaal. The case was adjourned until Monday, when the defendants will be sentenced.

### WEATHER BULLETIN.

May Will be Variable and Late Frost the Last of the Month.

(Copied by Prof. W. T. Foster.)

ST. JOSEPH, Mo., April 24.—My last bulletin gave forecasts of the storm waves to cross the continent from April 28th to May 2d, and the next will reach the Pacific Coast about May 2d, cross the west of Rockies country by close of 4th, great central valleys 5th to 9th, Eastern States the 10th.

The warm wave will cross the west of the Rockies country about May 3d, the Great Central valleys the 5th and the Eastern States the 10th. The cool wave will cross the west of the Rockies country about the 6th, the Great Central valleys the 8th and the Eastern States the 10th.

The feature of the storm wave described in the above mentioned disturbances and weather changes will be dry weather in the Northern and seasonable weather in the Southern States.

The second storm wave of May will reach the Pacific Coast and develop a low barometer about the 9th, cross the west of the Rockies country by the close of the 10th, the Great Central valleys from the 11th to the 13th and the Eastern States the 14th.

The warm wave will cross the west of the Rockies country about the 9th, the Great Central valleys the 11th and the Eastern States the 13th. The cool wave will cross the west of the Rockies country about the 12th, the Great Central valleys the 14th and the Eastern States the 16th.

The weather conditions with this disturbance will be a continuance of those of the previous week, with dry North and fair crop weather South.

### GENERAL MAY WEATHER.

Temperature for May will be generally above the normal except in the Upper Mississippi and Red River of the North valleys, and about the upper lakes, where colder averages are expected.

The warmest averages are expected near a line drawn from the North Atlantic coast along the Ohio and Mississippi valleys and westward through Denver and Salt Lake City.

The Middle and South Atlantic coasts will have about average temperatures and the Southern States a little above the average.

Rainfall will be deficient in the northern portion of the Great Central valleys about the Great Lakes and in the North Atlantic States. From Fort Scott, Memphis and Nashville northward the rainfall will be below the normal.

The Southern States, Middle, Atlan-

tic and South Atlantic will have about the average precipitation.

The heaviest rains will be in the Rocky mountains and on the western slope. The Upper Missouri and Red River of the North Valleys will have fair rains.

More than the usual amount of rain will fall in Cuba and the rainy season there will give more than the usual amount of wet.

The most severe storms of the month will probably occur from the 22d to the 24th.

The most probable time to expect late frosts will be from the 25th to the 27th.

### The New Catholic Bishop.

Thomas Grace is now Right Rev. Bishop of the diocese of Sacramento, and on and after to-day will perform the duties of that office in the Catholic Church. Yesterday he received official confirmation of the cablegram of February 27th, which first announced his selection to fill the place left vacant by the death of Bishop Manogue. The documents also notified Bishop Grace to prepare for his consecration. This latter ceremony will take place in the month of June. It will doubtless be celebrated in the cathedral in Sacramento and will be a very elaborate and impressive affair, and will be witnessed by clergy from all parts of the State.

### Justice Court.

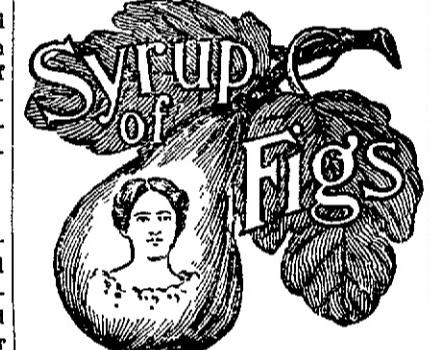

Jeff Brisbois, convicted of petit larceny, was sentenced to six months in the county jail, and James McCray, who was associated with the former, to three months.

Jeff Brisbois, convicted of petit larceny, was sentenced to six months in the county jail, and James McCray, who was associated with the former, to three months.

The examination of D. McLeod, charged with burglary, will take place this morning. The circumstances point strongly to the guilt of McLeod, as a quantity of stolen goods was found in the cellar and garret of the blacksmith shop where he had been employed. The defendant was put under \$800 bonds by Judge Linn.

### Entertained at San Francisco.

The Nevada Press Association arrived at San Francisco Thursday and the members and guests were royally entertained by the Press Club in the evening. Mayor Sutro received and entertained them at Sutro Heights yesterday. They will probably return this evening or to-morrow morning.

### Gladness Comes

With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge, that so many forms of sickness are met with in any actual disease, but also with a continued condition of the system, which the pleasant, full-laxative Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

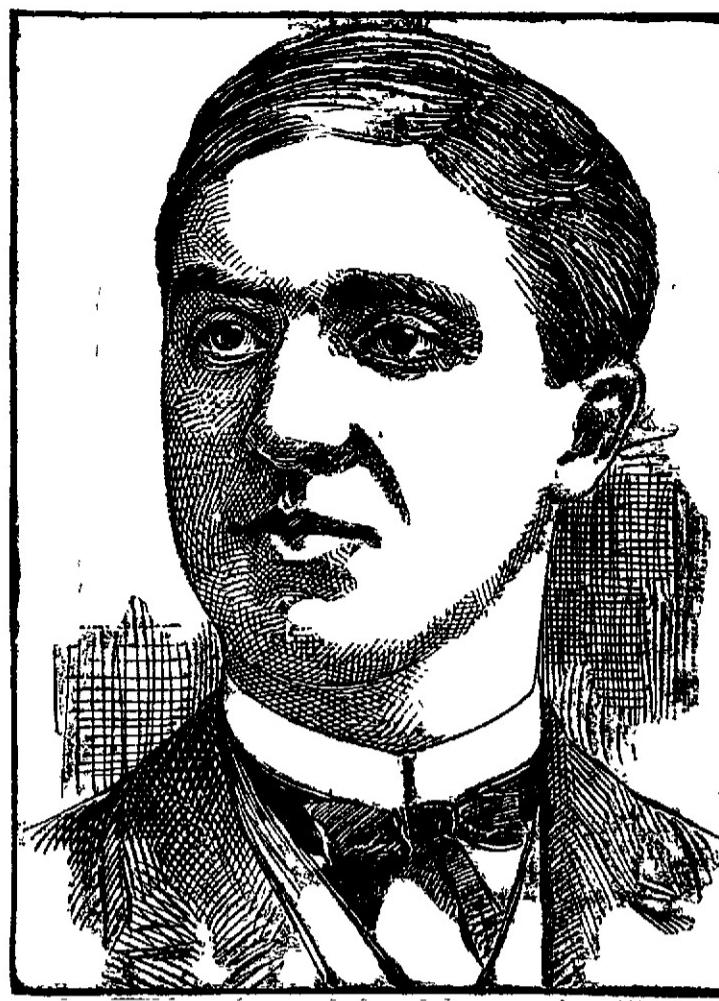

It is the one great practical remedy advocated by all physicians.

It drives away that feeling of utter exhaustion that is so common in the spring, but no less dangerously significant because it is so common. It makes people well. It is a thousand times superior to all the ordinary sarsaparillas, nervines and tonics ever made.

Paine's Celery Compound is the one real spring remedy known to-day that never fails to benefit. Get Paine's Celery Compound, and only Paine's Celery Compound if you wish to be well.

## MAYOR OF ST. CHARLES.

One of the Thousands Whom Paine's Celery Compound Has Cured.

The following long and explicit letter from Hon. A. A. Bennett tells its own story.

Read it:

Mayor's Office,  
CITY OF ST. CHARLES, Ill., March 4, 1896.

Wells, Richardson & Co., Burlington,  
Vt.: Gentlemen—I take much pleasure in being able to add my mite to the great mass of testimony in praise of Paine's Celery Compound.

In November last I found myself much run down by overwork. For several weeks I had been obliged to work 18 hours daily out of the 24, and was in consequence in a state of physical and nervous exhaustion. At the suggestion of a friend I commenced the use of Paine's Celery Compound, with the result that my strength has steadily improved, and I find myself in far better health than I have known for years.

I believe also that it has enabled me to escape my periodical attack of rheumatism, as every season since that time with the advent of the cold, damp weather, I have suffered severely from that disease in a chronic form. So far this winter I have escaped without a single twang of my old enemy. I very cheerfully recommend it to any one in similar need, in the full belief that it will be helpful in every case. Very sincerely yours,

A. A. BENNETT.

If we all lead out-of-door lives, went to bed at sundown, and had no consuming cares nor hard work to bring down the health, there might not be the urgent necessity that now exists for taking the best of spring remedies, Paine's Celery Compound.

But as the great majority of lives are ordered—with too much work, too much anxiety, too little sleep, by the time winter is over the drain on the nervous energy has become excessive, the nerves are in sad need of being strengthened, and the blood of being purified.

Paine's Celery Compound absolutely meets this great modern necessity.

Paine's Celery Compound will bring back nerve strength and replace poor, thin, pale blood with a ruddy, health-making stream.

It is the one great practical remedy advocated by all physicians.

It drives away that feeling of utter exhaustion that is so common in the spring, but no less dangerously significant because it is so common. It makes people well. It is a thousand times superior to all the ordinary sarsaparillas, nervines and tonics ever made.

Paine's Celery Compound is the one real spring remedy known to-day that never fails to benefit. Get Paine's Celery Compound, and only Paine's Celery Compound if you wish to be well.

## BREVITIES.

Read Sol. Levy's new ad. to-day. Genesys & Savage, plumbers and tinners.

Have you catarrh. Use liquid Viava.

Paints and oils at Lange & Schmitt's.

Nott Leete has returned from Mexico and is visiting his parents.

Park's Tea clears the complexion. Sold by S. J. Hodgkinson.

H. K. Brown of Carson was a west-bound passenger last night.

Garden tools, water pipe, plumbing and tinning at Lange & Schmitt's.

C. Novacovich has a partially furnished house for rent. See 50-cent ad.

Over two and a half feet of snow is reported at Truckee for the late storm.

Plows, plow points, land sides, plow handles and beams at Lange & Schmitt's.

Dave Dysart of Floriston spent the day here yesterday, returning home in the evening.

Read the 50-cent ad. for the May Day entertainment to be given by the Epsilon League.

Have you piles? Use Sano, prepared by the Viavi Company. It reaches the worst cases. Try it.

If a sack of Riverside Mills' Gold Medal flour is once used, no other brand will be purchased.

The District Court was occupied all day yesterday in trying the case of the estate of A. Nadon vs. McIntosh.

Ed Swan, the rustling tea drummer, arrived from the eastern part of the State last night and remained over.

Finley Cook has just completed the interior decorating of Chas. Gulling's residence, and it is an excellent job.

Last night the V. & T. passenger train was forty-five minutes late, owing to the breaking of a tank box.

The train from the east last night was about two hours late, the delay being caused at the Ogden end of the road.

The Woman's Guild of Trinity Church will meet Saturday, April 25, at 2 p. m., with Mrs. W. D. Phillips, E. C. Babcock, Secretary.

Get your chickens and spring lamb for Sunday dinner at Dixon Bros' market. They have a fine assortment of beef, mutton, pork, etc.

A. G. Spangler, scientific optician; eyes examined free. Office hours—10 to 12 a. m., and 2 to 5 p. m. Wager House, opposite N-C-O depot, m21ft.

Have you stomach trouble? Use Viavi tablets. We are having wonderful results. All of the Viavi remedies can be bought of Mrs. B. E. Hunter.

For natural looking and comfortable fitting artificial teeth go to Hutchinson. His painless extracting is just the thing. Office Sunderland's building. j15m3.

Mrs. Josiah Springer and Mrs. I. W. Springer of Unionville were passengers for San Francisco Thursday evening. They go to California in search of health.

Mark G. Cecil, formerly clerk at the Palace Hotel, but now a guard at the State's Prison, spent the day here yesterday and took the train for the west last night.

Willard Shaff, the contractor, received a telegram that his daughter Cora, at San Francisco was very sick with pneumonia. He left immediately on the evening train.

The Adams-Booth Company of Sacramento have confined the sole agency of the famous Park 5-cent cent cigar to Chas. Becker of the Model. All others are counterfeits.

At the Hotel Reno last night: A. S. Bailey, Batavia, California; C. E. Emerson, Susanville; R. Wallenbrook, Sacramento; R. W. Smith and Edward Porter, San Francisco.

Jas. Kneebone, Virginia; F. A. Jones, Sacramento; Julius Sultan and J. A. McDonald, San Francisco; Sam Platt and F. S. Oliver, Carson, were late arrivals at the Palace last evening.

Chas. E. DeLong, ex-representative of the United States as Minister to Japan, died sixteen years ago last Thursday. He was well known and very popular in Nevada.

## CARSON MINT SHORTAGE.

## SECOND TRIAL OF JOHN T. JONES

## FOURTH DAY.

## Prosecution Testimony Continued

## Strong Figuring Against the Defense—Some Incidents.

(Correspondence of the JOURNAL.)  
CARSON CITY, April 24, 1896.

Warren Noteware, chief clerk of the mint, resumed the witness stand under the examination of General Clarke for the prosecution. The two bogus melts of 1891 aggregated 453 ounces, valued at \$8,400; the two made in 1892 aggregated 1,278 ounces, valued at \$16,300; total \$23,700. Another bogus melt in 1894 was 1,045 ounces, valued at \$19,400, with the famous Bodie melt, making six bogus melts in all discovered. This is the weight and value of the originals or genuine melts represented or misrepresented by the bogus. I am unable to state the value of the bogus melts.

These newly discovered bogus melts have been found within the last three weeks, or since the other trial of Mr. Jones. Witness then gave the full detailed history of that bogus Bodie melt which fell short over \$20,000, too familiar in our reports for repetition.

Its discovery was the first clue to the shortage, the records following up, as has been even more recently developed.

John T. Jones was in the mint from March, 1890, till July, 1895, when he was suspended. He was assistant under Zabriskie, Melter and Refiner in 1891-92, when the first four bogus melts mentioned were made.

Cross examined by Woodburn—I became chief clerk of the mint in July, 1894, which position I still occupy. I have no connection with any of the other departments of the mint, but necessarily have a general knowledge of them all. I act sometimes in place of the Superintendent in case of his absence; have had no experience in the mint business outside of this one. Defendant was working manager in his department, but did not practically perform the duties or work of melter; don't know of any experience he had in that line.

Witness gave a mass of figures about the shortage and statements as to the duties of the officials and employees of the mint, repeating what he gave at the former trial.

## AFTERNOON SESSION.

Learned of the loss of the small gold bar No. 168 from Harris. There is no record of its ever going to the refinery.

The bogus Bodie melt shoe bars, ten in number, were shown to the jury. Witness read a long list of melts from the consolidation melts book and showed to the jury how the four leaves had been ingeniously abstracted from it, preventing the tracing of the bogus melts from first to last. All is straight and correct since Harris came in as Melter and Refiner.

The molds in which the bogus Bodie melt were cast were shown to the jury, also the stamps or dies for marking bullion bars. Also a box full of small gold bars brought over from the mint from three to thirty ounces each, which General Clarke explained and illustrated were easy for any one to slip into his pocket if dishonestly disposed.

The original Bodie melt consisted of seven bars and a link, or one-third, increased to ten bars and a link, the

bogus melt shoe bars, ten in the box.

G. W. Likens, silver dissolver in the refinery, employed in that department since July, 1893, showed the jury the interior workings of the mint by aid of the diagrams and gave a detailed description of the sulphuric acid and other processes for separating and refining the gold and silver. Pierce and Heney were employed in the cupel room. None of the employees were ever searched for shortage.

At 4:30 p. m. Court adjourned till 10 a. m. to-morrow.

U. S. Secret Service Detective Baker has been in town all the week, arriving last Monday from the East.

## A BOGUS MELT.

My attention has been called to the Virginia Chronicle of last evening, in which the brainy "local" thereof coolly embezzles and appropriates my letter of Sunday morning bodily, ungenerously crediting the same to an "exchange." He judiciously clipped my name off the bottom, however—a bullion or sheep thief judiciously destroys the marks or brands. Such a thing would be classed in Carson as a "bogus melt."

It's complimentary, yet unjournalistic, you know, and disagreeable. A fellow hates to be called an "exchange" when he's not even on the exchange list. Next thing you know that brainy local will be embezzling the Lord's Prayer and crediting it to an exchange.

## ALT DOTEN.

All members of the Young Men's Christian Association are requested to meet at the rooms this (Saturday) evening at 7:30 o'clock. Mr. Spears will address the Association. All friends are invited.

## By order of the President.

## Nevada Dentists.

The State Board of Dental Examiners are to meet on Sunday, May 3d, in Reno. The principal business of the meeting will consist of the examination of applicants who desire to practice dentistry in the State, the endorsing of diplomas and other business relating to dentistry.

## Y. M. C. A. EVENTS.

The State Secretary of California will hold a series of meetings in the interest of the Association.

Mr. John L. Speares, the State Secretary of the Young Men's Christian Association of California, is expected to arrive this morning to hold meetings in the interest of the Association at Reno.

The committee having the matter in charge have outlined the program of meetings as follows: Saturday evening at 7:30, special meeting at Association rooms. Mr. Speares will address the members and friends interested in the work of the Association.

Sunday afternoon at 3 o'clock, Men's meeting address to men by Mr. Speares. Sunday evening, 7:30, mass meeting at Congregational Church; address by Mr. Speares, "The Young Men's Christian Association, What is it, and What is it Doing?" Also short addresses by prominent citizens of Reno.

It is expected that the visit of Mr. Speares will be of much benefit to the local Association as it will tend to bring the work of the Young Men's Christian Association prominently before the people. Mr. Speares is a good speaker and well posted on the work of the Association, and all who attend the meetings may be sure of hearing something that is interesting.

## Were Not Appreciated.

Santa Barbara gave the sagebrush journalists a practical demonstration of how little consequence they were, as far as the outside world was concerned. Notwithstanding they heralded their approach to the city by telegraph and other means, their arrival did not even create a ripple. The eloquence of Hummel of the Dispatch had never been heard in Santa Barbara; the wit and humor of Sam Davis was so coarse that it wasn't appreciated; the dignity of President Kelley caused cold wave that injured the fruit crop of that section, and even the Ward McAllister appearance of Alton Bragg of the Gazette did not make the slightest impression. Sproule, Booher, Vandy and other representatives of the great west were of such minor importance that their presence was unheeded, and Santa Barbara is to-day where it was a month ago and it is possible that its inhabitants never heard of the Nevada Press Association.

## "A Pair of Kids."

This musical pantomime farce which is to be the attraction at the Opera House on Thursday evening, April 30th, is sold to easily distance all competitors in laughing features, and comes to us from fresh conquests over the abilities of the amusement-seeking public that have eclipsed all its records of the past ten seasons. The character of Jiles Button, which Mr. Kendall has made so familiar to the theatre-going public during run of ten years, is a veritable old country "jay" with all the backwoods homeliness and characteristic awkwardness that could possibly be instilled into such a character—as grotesquely humorous as he is thoroughly original. The "Kids" are spoken of as being funnier than ever.

## Social Events.

Company C, N. N. G., gave one of their pleasant parties last night. There was a good attendance and the evening passed off pleasantly.

A Leap Year party took place at the Riverside Club House and was conducted under the ruling custom of such affairs. There was a good attendance and dancing was kept up until a late hour.

## Bucklin's Arrows Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, teeth, chapped hands, chilblains, corns and all skin eruptions, and positively cures piles or no pay required.

It is guaranteed to give perfect satisfaction or money refunded. Price 25cts.

When you want to get a bottle of Mrs. Winslow's Soothing Syrup.

It has been used by millions of mothers for their children's teething. It will relieve the poor little sufferer immediately. Depend upon it mother, there is no mistake about it. It cures Diarrhea, regulates the Stomach and Bowels, cures Wind Colic, softens the gums reduces Inflammation and gives Tone and Energy to the whole system. Mrs. Winslow's Soothing Syrup for children's teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States. Price twenty-five cents a bottle.

It is sold by all druggists throughout the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup."

Information Wanted.

Candido Fernandez desires information that will lead him to find Antonio Linzunay Jose Iteta. Should either of the above parties see this advertisement please address a letter to

CANDIDO FERNANDEZ,  
april22w.

Reno, Nev.

## Housekeeping Rooms.

Mrs. W. H. Stevens offers a special inducement to a man and wife to occupy furnished housekeeping rooms in a convenient locality.

She will be alone during the summer and would like a family in the house. Apply at the residence, on 2d street between Center and Lake streets.

april21w.

## Kawson's Specific.

Please call second door north of Opera House and get a bottle of Mrs. Winslow's Soothing Syrup for children's teething. It will relieve the poor little sufferer immediately.

Depend upon it mother, there is no mistake about it. It cures Diarrhea, regulates the Stomach and Bowels, cures Wind Colic, softens the gums reduces Inflammation and gives Tone and Energy to the whole system. ## Marvelous Results.

From a letter written by Rev. J. Gunderman, of Diamondale, Mich., we are permitted to make this extract:

"I have no hesitation in recommending Dr. King's New Discovery, as the results were almost marvelous in the case of my wife. While I was pastor of the Baptist Church at Rives Junction she was brought down with Pneumonia succeeding La Grippe. Terrible paroxysms of coughing would last hours with little interruption and it seemed as if she could not survive them. A friend recommended Dr. King's New Discovery; it was quick in its work and highly satisfactory in results." Trial bottles free at S. J. Hodgkinson's drug store. Regular size, 50 cts. and \$1.

## MODERN CANDLES.

THEY ARE GREAT IMPROVEMENTS  
OVER THOSE OF FORTY YEARS AGO.

Light Has Been of Inestimable Value to Man—It Is a Mistake to Think That Gas and Electricity Have Completely Snuffed Out the Candle.

Candles have again come into use as means for lighting reception rooms where gas is considered too bright and electric lights too glaring, especially being made with the candle bay and those of the long ago.

At a very old man who still remembers the oldfashioned "tallow dip," in the period that he bought at the age of perhaps may have helped to him in a domestic way on Saturdays night to go from school.

Let a few years since candle making was a very important and necessary part of every household, and yet so rapidly are they now banished to the lists of forgotten and useless things that there must be thousands of young people to whom a pair of snuffers and a candle mold would prove undoubted curiosities. They were not very pleasant to the nostrils, those old fashioned tallow candles, their illuminating power was not good, and their need of constant snuffing was indispensable, though the fingers were the handiest of surfaces one was apt to get badly singed in the course of an evening.

Yet the world stumbled along with no better light than that for 18 centuries and accomplished considerable things on the way. Great scholars were made by saved up candle ends, great volumes written and the world enlightened, even if the writers and teachers groped a great deal.

The great performances of Garrick and Siddons were given behind footlights of tallow candles, and the candle snuffer was one of the most important of the theater of the olden time. "Without a candle snuffer," says Goldsmith in play he had seen, "the piece would lose half its embellishments."

In the days "early to bed and early riser" was a maxim that had much more significance, for it was necessary to get more out of daylight than in this regard—electricity. Candles have always occupied an important place in life's trip. In the old times Christmastime was called the Feast of Lights, because many candles were used at the church. The custom of setting a candle instead of a dead person after "die out" is still a practice.

Most people think that candles are bad, but in us nowadays they are mis-

understood. There are still several candle makers in New York. A very excellent one is done here, chiefly in the Hudson and Central Amherst, the demand for sales are probably a western states.

Large quantities, for no

candles are used in gold and silver mining.

Candles are also used for church par-

ticular country hotels, and to some ex-

ceptionally, newly come to the country, to candles in preference to oil, being accustomed to candle and afraid of oil.

Oil is not a great while old; although it is not a great while before they are over to the use of oil, there are always thousands of others who, for the last few months of the year, have shun oil as they would a disease.

No branch of industry has undergone so great a change that candle making has in the last 30 years.

Formerly it was mainly a mechanical operation. Anybody could make candle and almost everybody did.

Now it is a scientific industry, bring- ing to it and the resources of chemistry. Formerly a candle was a greasy, noisome thing that one usually handled with disgust; now it is artistic and refined and can be handled without the least offense. The wick is so prepared that the combustion is complete, and snuffers have long been banished. An ancient candle maker could only work with materials already provided by nature, so that he had to use fats, with all their impurities.

The modern candle maker by chemical process removes impurities, which leaves him nothing but the hard and white fat for his candles. Fat changed by this process is called stearine, and from this material is made the candle and stearine wax candles. These are extremely hard and are sometimes called admantine, do not grease the hands and give a soft and pleasing light. Creme and wax candles are also made.

The candle has ever remained the best of light. Sometimes you hear of a candle being gas, being of 25 candle power. The standard is a spermaceti candle burning at the rate of 120 grains of spermaceti per hour. There are candles, too, which are made of paraffin, but no candles are used so extensively as the star or stearine.

The great improvement in the manufacture of candles dates from the investigations of the French chemist, M. Chevreuil. He discovered that the fat of tallow was separable from the oil, and the result of the process was two valuable products—stearine and glycerin. Those who have used the candles of the past can scarcely realize that candles can now be shipped to warm climates. In former days a merchant would as soon have thought of exporting skates or snowshoes to Havana as a cargo of tallow candles. They would have all melted into an indistinguishable mass going across the gulf of Mexico. But such candles as are made now can be used in the hottest climate in the world.

Candles, however, are not a cheap light. A box of them will cost as much as a barrel of oil, and yet the barrel of oil contains nearly 80 times the illuminating power of the box of candles. The only great advantage of the candle is its safety.

Oil and gas are much cheaper. Where candles are used danger from fire is reduced to the lowest.—New York World.

Will practice in all courts. Probate practice and business settlements specialty.
